

HiWi-Job (m/f/d) (up to 80h/month) in Design and 3D Printing

Your Responsibilities:

We are currently looking for a dedicated student assistant to support our team in the development of wearable skin deformation devices (e.g. in the form of a glove). The work is associated to the project ROMEO: <https://www.l3s.de/research-at-l3s/all.projects/romeo/>

- Design of components using CAD software
- Preparation and Execution of 3D Printing
- You will assist in assembling, testing, and continuously improving prototypes.

For application, please add motivation letter, CV, course transcript (Notenspiegel), certificates and other documents relevant to the position in a single PDF file to Email: nicolas.navarro@l3s.de

Contact person:

Dr. rer. nat. Nicolás Navarro-Guerrero
E-Mail: nicolas.navarro@l3s.de

What You Should Bring:

- Experience with CAD programs (e.g. SolidWorks, Inventor)
- Interest in and ideally some knowledge of 3D printing and prototyping
- Independent, reliable, and structured working style

Date:

immediately
